

eCDLS (eCore Disaster Life Support)

DHS Course #: AWR-197-W
Training Level: Awareness

Hours: 4.0
Format: Online Training

Description

The *eCDLS (eCore Disaster Life Support)* online training course is an introduction to all-hazards preparedness and provides an overview of disasters including events such as natural and man-made, traumatic and explosive, nuclear and radiological, biological and chemical. The overall goal is to introduce participants to basic concepts and terms. This course was developed by the American Medical Association in collaboration with the National Disaster Life Support Foundation.

Primary Audience

The primary audience for this course includes basic EMTs, allied health workers and technicians, law enforcement officials, administrators and planners, entry-level Medical Reserve Corps, dentists, pharmacists, office-based physicians and nurses and anyone needing an introductory program.
